

## **BLADE/HP Baseline Software Definitions and Entitlements**

“Baseline Software” is defined as the current software version available on switch hardware on January 31, 2008.

“Switch Hardware” is defined as one of the following switch modules available for the HP BladeSystem:

GbE2c Layer 2/3 Ethernet Blade Switch

HP 1:10Gb BL-c Switch

Any customer possessing the abovementioned Switch Hardware may upgrade to the Baseline Software release and its subsequent Software Maintenance Releases regardless of initial image or warranty on their switch.

<b>Switch Module Hardware</b>	<b>Baseline Software Version</b>
HP GbE2c Layer 2/3 Ethernet Blade Switch	2.X
HP 10Gb BL-c Switch	2.X

Software Upgrade Rights for any other switch modules not listed above may be purchased by contacting [services@bladenetwork.net](mailto:services@bladenetwork.net).

For switches purchased after January 31, 2008 you are required to send serial number information to [services@bladenetwork.net](mailto:services@bladenetwork.net) within 2 business days of the download.

For a full description of software definitions please refer to the BLADE Network Technologies / HP End User License Agreement.
