

RackSwitch Baseline Software Definitions and Entitlements

“RackSwitch” or “Switch Hardware” is defined as one of the following switch models:

RackSwitch G8000

RackSwitch G8052

RackSwitch G8100

RackSwitch G8124

RackSwitch G8124-E

“Baseline Software” is defined as the software version that BLADE Network Technologies will support through software updates or maintenance releases for the life of the switch hardware.

Any customer possessing the abovementioned Switch Hardware is entitled to the Baseline Software release and its subsequent Software Maintenance Releases regardless of initial image or warranty on their switch.

Switch Model	Baseline Software Version
RackSwitch G8000	1.0.X
RackSwitch G8052	6.3.X
RackSwitch G8100	1.0.X
RackSwitch G8124	1.0.X
RackSwitch G8124-E	6.3.2

For a full description of software definitions please refer to the BLADE Network Technologies End User License Agreement.
